

2017 California Almond Nursery Sales Report

California Department of Food and Agriculture

Cooperating with the USDA, National Agricultural Statistics Service

Pacific Regional Office · P.O. Box 1258 · Sacramento, CA 95812 · (916) 738-6600 · (855) 270-2722 Fax · www.nass.usda.gov/ca

Released: February 27, 2018

OBJECTIVE

The primary objective of the California Almond Nursery Sales Survey is to estimate future almond acres based on the number of almond trees sold for new plantings. This report summarizes data supplied by California nurseries throughout the State who sold to almond growers for commercial plantings. Results from this survey will be used in conjunction with the Almond Acreage Survey to estimate the almond acres in California.

PROCEDURES

Questionnaires were mailed to all known almond nurseries in California and responses were received from 7 out of 10 operations. The nurseries were asked to report the total number of almond trees sold for commercial plantings and the total number of Nonpareil variety sold. They were also asked to report the percent of trees sold for new almond orchards, for replanting an existing orchard, or to replace trees within an already existing almond orchard. The totals are only for those nurseries that reported. Acres planted were calculated using the reported number of trees sold, along with the trees per acre from the Almond Acreage Survey.

ACKNOWLEDGMENTS

The USDA, NASS Pacific Regional Office sincerely appreciates the nurseries for providing the information. A special thanks is due to the Almond Board of California for providing funding and support for this special Almond Nursery Sales Survey.

RESULTS

There were at least 9.2 million almond trees sold by California nurseries since June 1, 2016. Based on the Almond Acreage Survey, plantings from 2013 to 2017 were used to calculate an average trees per acre of 135. This results in nearly 68,000 acres of almonds planted from June 2016 through May 2017. Over 30,000 of these acres were Nonpareils. A little over 58 percent of the total trees sold (40,000 acres) are new almond orchard acres and 38 percent (26,000 acres) replace existing almond orchards. The remaining trees sold replaced trees within existing almond orchards.

ALMOND NURSERY SALES SURVEY

Acres	Sold June 2014-May 2015 ^{1/}		Sold June 2015-May 2016 ^{1/}		Sold June 2016-May 2017 ^{2/}	
	All varieties	Nonpareil	All varieties	Nonpareil	All varieties	Nonpareil
Total	96,000	33,000	108,000	32,000	68,000	31,000
New Orchards	72,000	25,000*	77,000	23,000	40,000	18,000

^{1/} 9 out of 10 nurseries responded.

^{2/} 7 out of 10 nurseries responded.
